

Composing a Fill-in-the-Blank Test

IMPORTANT: Each Fill-in-the-Blank test must be saved as a text file which ends with the extension ".FB" (note the period). Eg, "FillInTheBlankTest.FB".

IMPORTANT: You cannot use asterisks (*) or hashes (#) in your tests as these characters are used to delimitate questions and responses.

Type in your title, then list each term followed by its definition. The term must come first. Place an asterisk (*) in front of each term and a hash (#) in front of each definition.

For example:

Scientist's Ball Quiz

*electrified

#Volta was (?) at the thought.

*boyant

#Archimedes was (?) at the thought.

*illuminating

#Edison thought it would be an (?) experience.

*flight

#Wilbur Wright accepted, provided he and Orville could get a (?).

*dash

#Morse yelled, "Can't reply now- gotta (?)".
